

For Corporate
Transportation Providers

Who we are

- A venture by Probytes (A well reputed Web Development Company)
- Developed by the same team behind trackschoolbus.com and vehicletracking.qa
- The Corporate Transportation Providers team consists of experienced and skilled developers, ideators, designers and testers
- Our goal is to share the technology that we possess to make working atmosphere safer and better

What is Corporate Transportation Provider System

The Corporate Transportation Provider System is to help companies manage their transport fleets efficiently and also reduce the stress involved with travel time for employees by optimizing routes. The solution is a combination of software (web and mobile applications) and hardware.

- HID Card enabled Employee tracking software
- A combination of hardware-software solution (PC-RIFD Card reader, card – Mobile Apps)
- Combines GPS and RFID technology
- Incorporated with AI(Artificial Intelligence) for self-learning and automation

Employee Transportation, why is it so important?

- Reducing transportation incentives of employees
- Attract and retain workers
- Expand service hours
- Protrude a environment friendly company image by reducing gas emissions and energy conservation

Hectic thy name is employee transportation

- Creates confusion inside the organization regarding allocation of drivers to vehicles
- A big risk when it comes to safety
- Lots of unwanted costs due to lack of efficiency
- Inconsistency in pickup time and drop off time
- Fights between employees-drivers-managers

What Corporate Transportation Providers Offers You

- Artificial Intelligence Features – Auto routing, Auto Allocation, Auto Optimization
- Experienced and skilled developers
- Easy to install and operate
- Training for all those who will operate the system
- High Quality Support
- Constant Updates
- Wide range of hardware compatibility
- Besides tracking, the system can be used for communication, surveillance, reports, alerts, fleet maintenance, etc.

Features of Corporate Transportation Provider System

- Ability to Geo Fence (Restrict the route map. If breached notification will be sent to the admin)
- Mobile Apps for each and every user for their unique needs
- Ranking and feedback system for drivers
- Communication portal for users to ensure maximum security
- Ability to integrate with third party hardware for extended functionalities
- Real-time as well as non real time notification service via app as well as through SMS

Features of Corporate Transportation Provider System

- Ability to optimize, generate (route map), allocate vehicles by its own with the help of AI (Artificial Intelligence)
- Different user profiles for different users and their access may vary according to authority
- Online bill generation and payment method
- Well explained driver guidance for assuring safety
